DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Dijaili et al (5,436,759).

Figure 5 discloses an optical amplifier that comprises: an amplifier input (front facet); an amplifier output (back facet); a semiconductor active region (501); an amplifying path (509) the input, output and active region; bragg gratings (503 and 504) forming a vertical laser cavity within the active region; and a passive optical element (512) formed on a common substrate with the vertical cavity laser.

This structure reads on claims 1, 5, 23 and 24.

Claims 2-4, 6-15 and 25-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 16-22 and 32-34 are allowed.

The "prior art" does not teach or suggest that the passive element be made by a separate process. The "prior art" also does not teach or suggest that the additional element on the substrate be an active device.

Drawings

Art Unit: 3663

New corrected drawings are required in this application because the present drawings are hand sketches. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Any inquiry concerning this communication should be directed to Mark Hellner at telephone number 703 306 4155.
